HELPING PLAN

Change Your Life, In Just 200 Rupees

ABOUT US

Just 200 is an organization dedicated to environmental conservation and community support in India. We plant trees to combat deforestation and reduce carbon footprints, while also providing financial assistance to individuals in need. Our initiatives focus on enhancing green spaces and supporting education, healthcare, and essential services. Join us in making a positive impact on the environment and people's lives.

MISSION & VISION

MISSION

To create a sustainable and greener India while uplifting individuals through direct financial support.

Just 200 is dedicated to enhancing environmental sustainability by organizing tree planting drives in urban and rural areas and providing financial assistance to individuals in need, fostering a healthier planet and stronger communities.

OUR OBJECTIVES

Social Welfare

Social welfare provides essential support and services, improving quality of life, and promoting well-being for disadvantaged and vulnerable populations.

Kanya Vivah Help

Kanya Vivah helps financially support the marriage of underprivileged girls, ensuring social security and reducing economic burden on families.

Disaster Relief

Disaster relief provides urgent aid and support to affected communities, ensuring survival, recovery, and rebuilding after natural or man-made disasters.

Women Empowerment

Women empowerment enables equal opportunities, strengthens rights, fosters independence, and ensures women's full participation in societal and economic spheres.

Old Age Care India

Old age care ensures dignity and quality of life for the elderly, offering healthcare, emotional support, and social engagement.

Tree Planting Initiatives

Just 200 organizes tree planting drives in urban and rural areas, engaging communities to combat deforestation, reduce carbon footprints, and promote green spaces.

CROWD FUNDING

Crowdfunding help involves raising small amounts of money from a large number of people, typically via online platforms, to fund projects or causes. It allows individuals and organizations to access funds quickly and directly from the community, often for personal needs, creative projects, business ventures, or charitable causes. It's characterized by a transparent, engaging process where donors or backers contribute to achieve a common goal.

WHAT IS P2P ?

A P2P (Peer-to-Peer) network is a decentralized network architecture where participants interact directly with each other without the need for a central server. In a P2P network:

Decentralization: There is no central authority controlling the network. Each node in the network can act both as a client and a server, enabling direct communication and resource sharing between peers.

Peer Nodes: Each device or computer in the network is considered a "peer" and has equal privileges. Peers can both request and provide resources or services.

Resource Sharing: Peers share resources such as files, bandwidth, processing power, or services directly with each other.

Autonomy: Peers operate independently and contribute resources to the network voluntarily.

Scalability: P2P networks can scale effectively because the addition of new nodes increases resources and capacity.

Resilience: P2P networks are often more resilient to failures or attacks because there's no single point of failure.
